Introduction

ENVIRON INDIA is a leading national provider of environmental, health, safety, risk, social consulting services and sustainability related services. We are a professionally managed environmental Engineering company providing 'concept to commissioning ' cost effective solutions by offering state of the art innovative and proven technologies to our esteemed client's to meet their environmental needs with a thrust on recovering the valuable resources like waste-water recycling thus making our systems a vital part of the respective industry. This commitment is demonstrated by the long term relationships we have established with our clients. Our Key to success has been the efforts of a well-orchestrated proficient, competent, capable, skilled, experienced and knowledgeable team. This and the emphasis on achieving results have enabled us to surpass our client's expectations resulting into awards in the form of bonus and repeat orders. **Environ India** was started in the year 2003, and is located in Basavanagudi in Bangalore. The company is backed by a team of experienced engineers having wide range of expertise in handling environmental related issues, and is professionally managed organization having experience and expertise in the fields of environmental engineering, project management, process design, erection and fabrication, execution, commissioning and operation & maintenance. The company has necessary infrastructure to conceive, conceptualize and co-ordinate the implementation of Turnkey Projects of design, execution and Operation of waste water treatment Plants for residential, commercial and industrial utilities.

Our mission is to provide accurate and timely technical information at a reasonable cost. We are committed to environmentally responsible operations, which include using natural resources wisely and considering the overall impact on the environment.

Services We Offer

Our core services are designed to meet the broad range of our clients' changing needs. The strong communities surrounding these practices ensures consultants can transcend geographical boundaries, develop innovative solutions in addressing our clients' challenges and work more closely with their sector-focused colleagues across the globe.

At Environ India as well as offering specific services to address a particular client's issue, we are conscious of the need to look at and address the wider strategic ambitions in an organization. Our team

of strategy consultants acts as trusted advisors to senior leaders in a number of the leading companies to find solutions to their environmental performance, operational and cultural challenges.

Services which we render are:

1. Design, execution, commissioning and Operation of water pollution control systems Sewage Treatment Plants, Water Treatment Plants and Effluent Treatment Plants under various Technologies like Activated Sludge Process, Sequencing Batch Reactor, FBBR, and DEWATS, etc.
2. Design and Execution of Air pollution Control systems like dust collectors, scrubber, bag filters Multicyclones, erection of chimneys, etc.
3. Process Troubleshooting.
4. Conducting of Environmental Impact Assessment Study.
5. Conducting of stack monitoring, ambient monitoring, and noise monitoring, water and waste water analysis.
6. Preparation of Onsite and Offsite emergency plans.
7. Conducting Environmental Impact Assessment studies/Environmental Management Documentation.
8. Turnkey projects on Hazardous/Solid Waste Management facility as per International standards
9. Rain Water Harvesting Designing & Execution.
10. Operation and Maintenance Support for existing Treatment Plants.

We are a professionally managed environmental Engineering company providing 'concept to commissioning ' cost effective solutions by offering state of the art innovative and proven technologies to our esteemed client's to meet their environmental needs with a thrust on recovering the valuable resources like waste-water recycling , Sewage Treatment plant (STP) , Effluent Treatment Plant (ETP), Air pollution control Equipment (APC), Technical assistance for Approvals from Karnataka state pollution control board, MOEF (SEIAA), Airport authorities, BWSSB, BSNL, BESCO, Plan Approval Form, BDA/BBMP/BIAAPA, BMRDA, KIADB, Bore well Approval from Central Ground Water Authority and Plan Approval from Karnataka State fire & Emergency services, . Thus making our systems a vital part of the respective industry. This commitment is demonstrated by the long term relationships we have established with our clients. If you, or your company, have been thinking environmental or liaison consultant we would like to meet with you to discuss your future objectives and how our services may be of help in obtaining your overall goals.

Our professional staff's experience encompasses "hands on" engineering and operations experience obtained in the environmental / engineering consulting industries. Practical engineering services have been provided for more than 100 clients across India. In a nutshell we provide concept to complete solutions in the field of Environment.

Environmental and Risk Management Consultancy Service

Environmental and Risk Management Services are carried out as per the guidelines of

- “The Air prevention and control of pollution act, 1981”.
- “The water prevention and control of pollution act, 1984”.

5. Safety Management System / Review.
6. Safety Report.

ENVIRONMENTAL CONSULTANCY

1. Environmental Impact Assessment (EIA)
2. Environment Management System (EMS)

Audit

1. Safety Audit.
2. Energy Audit

For all activities related to Safety and Risk management we generally adopt the base guideline of OISD / OSHA

Consultancy

1. Liaison services for obtaining Prior approval for Environmental Clearance,ETP/STP and plant installation.
2. Design of Pressure Vessels, Metallurgical Health-Condition Assessments, Reusability Study, Residual Life Analysis of equipment and plant.

Why work with *Environ India*

There are many reasons why our clients continue to work with us, the primary being we help them all address their strategic and operational challenges in a more sustainable way. We provide innovative solutions from high level Group reviews to the detail of a local offshore impact assessment; while a number of companies can do some of this work, very few can do all of it.

Anything related to Environment is all we do. The breadth of experience over our 13 years history means we have an unrivalled track record and excel at taking on the more complex and challenging projects that others seem reluctant to.

Our all staffs are motivated, highly qualified and experienced technical professionals, working alongside strategically focused advisors.

Health and Safety

At Environ India, we believe that ensuring the health and safety (H&S) of everyone involved in any aspect of our work - including Environ India employees, clients, contractors, communities and the public is the foundation of our license to operate. We recognize that our daily actions, whether we are working in office locations or sensitive sites throughout the India, require diligent safety planning and management.
